

THE ORIGINAL HYDRAFINDER™

BY **RoDon**... "INNOVATORS OF CRITICAL HIGH-VISIBILITY LOCATING DEVICES"

HIGH DAY/NIGHT VISIBILITY

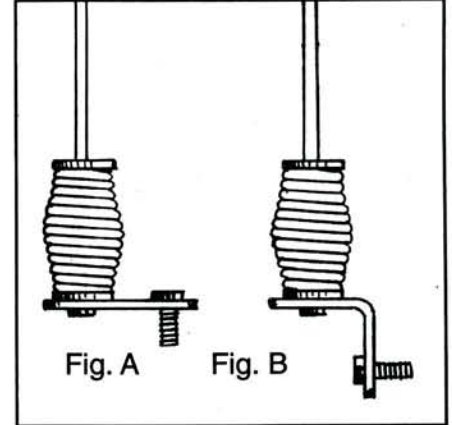

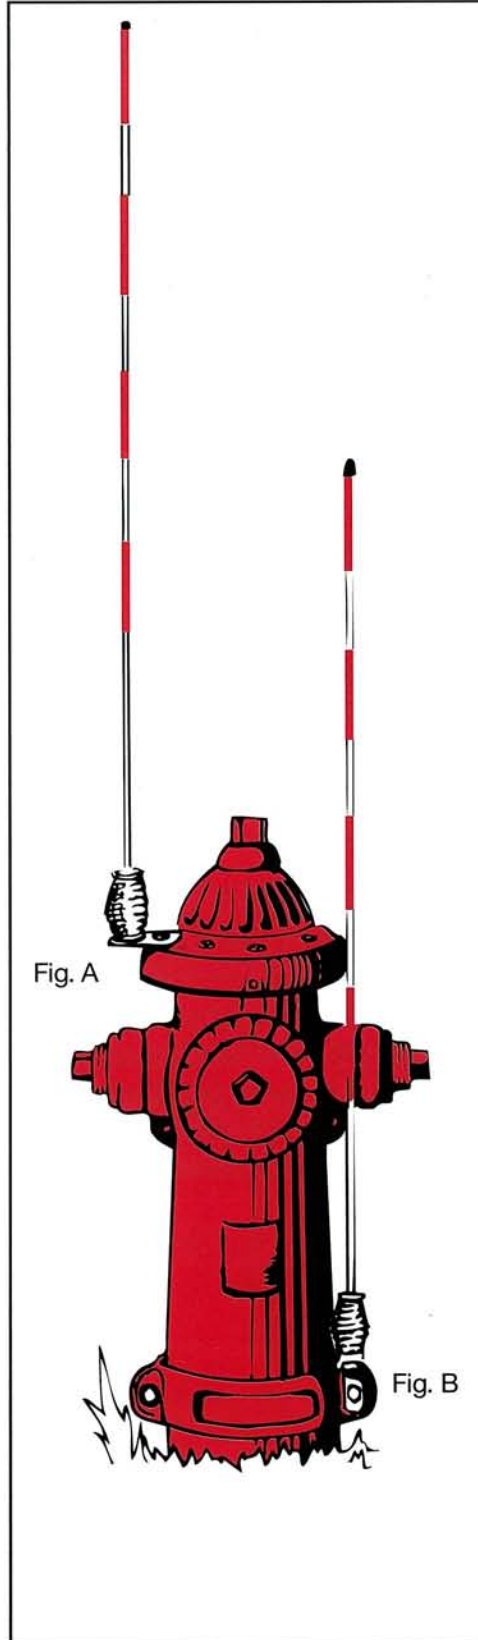

The 6" wide **highly reflective** red striping tape on the white HYDRAFINDER™ fiberglass shaft affords instant day and night visual location of the fire hydrant. The high-visibility HYDRAFINDER™ quickly locates hydrants buried in snow or covered with seasonal vegetation overgrowth.

VANDAL PROOF

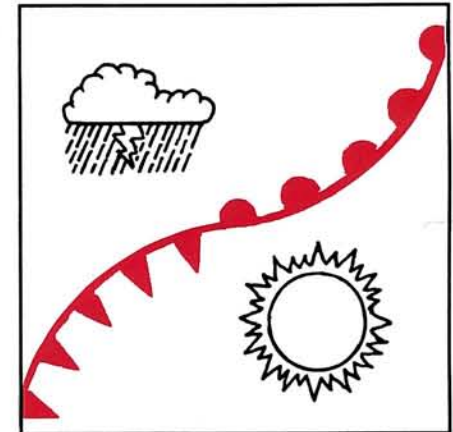

The resilient 3/8" diameter white laminar matrix fiberglass HYDRAFINDER™ shaft is attached to a heavy duty MIL SPEC chrome plated carbon steel spring mount that allows for 360° **total flexibility**.

* The Manufacturer claims no responsibility for any misuse of the HYDRAFINDER™ beyond its intended and specified function as a high-visibility fire hydrant locating device.

UNIVERSAL MOUNTING BRACKETS

The HYDRAFINDER™ is adaptable to most standard fire hydrants with an easy to install 5/8" diameter bolt on steel "flat" (Fig. A) or "L" (Fig. B) mounting bracket.

WEATHER RESISTANT

The HYDRAFINDER™ fiberglass shaft is **corrosion free** and **UV resistant**.

ADDITIONAL FEATURES

- The HYDRAFINDER™ may be ordered in the standard 5' length or a customer specified 7' length.
- Custom reflective striping denoting community, association, or collegiate loyalty is available in Orange, Yellow, Blue, or Green. *Fluorescent striping is available upon special request.*
- Shipped fully assembled, the HYDRAFINDER™ hardware includes the customer specified "L" or "flat" steel mounting bracket and the MIL SPEC spring mount.
- The HYDRAFINDER™ requires **no maintenance** and may be easily removed for seasonal use only.
- A full three year warranty covers all HYDRAFINDER™ component parts against weather deterioration.
- ALL COMPONENT PARTS ARE MANUFACTURED AND ASSEMBLED IN THE USA.
