QUICK RELEASE™ TUBING CUTTERS FOR PLASTIC

FEATURES

- **Best tracking**, easiest cutting tubing cutters available.
- With a simple wheel change, Quick Release™ cutters can be used for a variety of plastic or metal pipe.
- Replace worn cutter wheels for faster and easier cuts.

Reed Quick Release™ tubing cutters are the industry standard; most recommended by plastic pipe companies and most imitated by other manufacturers. Quick Release™ tubing cutters for plastic are the best cutters for small, medium and large diameter work and feature sliding bars now with magnesium for added strength. They cut clean and square with very little burr. Additionally, field reports indicate that Quick Release™ Tubing Cutters with Reed OP2 or 30-40P cutter wheels are well-suited for use on ABS pipe.

★ NEW *EXCLUSIVE SIZES

*Features spare cutter wheel in knob. TC1QP, TC1QPVC, TC1.6QP, and TC1.6QPVC have spare "O" wheel. TC2QP has "OP2" wheel, TC2QPVC has "O" wheel.

**TC8QP comes with a cradle and parting blade for cutting thick plastic pipe. The parting blade can cut to a depth of 1 1/2 inches (38.1 mm) on plastic pipe.

NOTE: To cut Aquatherm® PP-R pipe, order Cutter Wheel #04159 with the TC5Q, TC6Q or TC8Q cutter.

QUICK RELEASE™ TUBING CUTTERS (for metal) ON P. 11
CUTTER WHEELS ON P. 7 - 9

✓ WHY REED?

Quick Release™ tubing cutters were invented by Reed and cover capacities up to 10" (254 mm). First used by Reed, the ball detent wheel pin makes cutter wheel change easy. Reed has the best cutter wheels specifically designed for all plastic applications.

SCISSOR SHEARS

FEATURES

- Ideal for cutting thin wall and small diameter plastic, rubber or nylon tubing.
- Includes an industrial-grade, non-stick blade for best performance.
- For safety and ease of operation, use Scissor Shears with **blade on bottom**.

Scissor Shears squeeze together for fast cutting of small diameter PE, PEX, thin wall PVC pipe, rubber or nylon tubing. Rotate scissor shears around tubing while squeezing handles together for the best cut. All models feature ribbed handles for more secure hold along with fiberglass strengthened nylon construction. Blade design maintains its sharp edge for long life and exact cuts. SC1 and SC125 industrial-grade blades are non-stick coated with a surface lubricant which lets blades slice smoothly through cut area.

Catalog No.	Item Code	Capacity		Length		Weight	
		actual O.D. in	actual O.D. mm	in	mm	lbs	kg

SC125B	94169	High Carbon Steel Blade fits SC125, SC125SL

NOTE: Scissor Shears are **NOT RECOMMENDED** to cut PVC or CPVC for solvent cement weld connections. Instead use QUICK RELEASE™ TUBING CUTTERS FOR PLASTIC ABOVE.

RATCHET SHEARS

FEATURES

- Ratchet Shears are **ideal for cutting** PE, PEX, PP and ABS pipe and tubing.
- **Smoothest** ratchet action for easiest cuts.
- Replace or resharpen blades for longer tool life and faster cuts.

Ratchet shears with hardened steel blades are ideal for cutting PE, PP, PEX and ABS pipe. **RS1PLT**, **RS7290**, **RSP1** and **RSP2** ratchet shears offer the thinnest blades with a finish that moves them smoothly through pipe. Due to its long handles that add leverage, the **RS2** is good for cutting up to 2" pipe. One-hand models **RS1** and **RS1PLT** offer a 7-step ratchet mechanism for best mechanical advantage and smoothest operation. **RS1PLT** is unique with a corrosion-resistant, nickel-plated, steel blade which makes it a good choice for corrosive environments. Pointed blade in one-hand model **RSP1** and **RSP2** helps start the cut in tough plastics and helps avoid bounce in thin wall material. The two-hand **RS2** features 2" capacity, extra wide, v-style jaws for easy alignment, and long handles for leverage on tough-to-cut pipe. **RS7290** are one-hand style, 2" capacity ratchet shears. All ratchet shears' blades can be easily sharpened or replaced, enhancing performance and saving money. These tools are not disposable and perform better, longer, and for less money over the tool's lifetime.

RS1

RS1PLT

RSP2

✓ WHY REED?

Broader base and 7-step ratcheting mechanism on RS1/RS1PLT models mean square cuts are easily attained with minimal clearance.

PLASTIC PIPE SAWS

FEATURES

- Cuts ABS, CPVC, PVC including C900 and larger diameter plastic such as 6" and 8" sewer pipe.
- Ergonomic-designed handle on PPS20 and PPS24 with large radius contours for hand comfort.
- Die cast design of handle on PPS12 and PPS18 makes blade change fast and easy.

Reed Plastic Pipe Saws are specifically designed to cut plastic pipe. The composition of plastic pipe, especially PVC, tends to be very abrasive, hence, saws designed to cut only wood become dull very quickly. It is therefore necessary to make saws with the proper profile, set and hardness to most effectively cut plastic pipe. PPS saws respond to this need while offering a competitive price and replaceable blades. Low profile **PPS12** and **PPS18** can reach into small spaces. Plus, their tooth design, set and hardness simplify cuts on ABS and PVC pipe. **PPS20** and **PPS24** feature 11 teeth per inch (more than average) and a unique pattern to create a bite that does not chatter on plastic or wood in the push or pull of the saw blade. This same tooth spacing makes these fast cutting. Reed plastic pipe saws cut Schedules 40 and 80 PVC, C900, CPVC and ABS, along with wood. PPS24 also cuts HDPE.

INTERNAL PIPE CUTTERS

FEATURES

- Conveniently cut from the inside (i.e. drain pipes or sprinkler drops, etc) using a standard 3/8" drill (not included).
- Exclusive, adjustable guide on IC1SL and IC3/4SL doubles as a **depth gauge**.
- Abrasive or saw toothed blade option.

Reed Internal Pipe Cutters cut pipe from the inside: below floor level or in the ceiling in new construction, around pools, and for replacement of closet flanges. Heat-treated steel, saw-toothed blades on the **IC1S**, **IC1SL** and **IC3/4SL** make for fast cutting. The **IC1A** comes with an abrasive blade for areas where the blade may come in contact with concrete or other hard surfaces which would destroy a saw tooth blade. All internal pipe cutters fit in a standard 3/8" drill (not included). During use, flats on the larger cutters keep the cutter from slipping in the jaws of the drill while a lock washer on the smaller cutters keeps the blades from slipping. All saw tooth internal pipe cutter models cut plastic pipe aggressively and can cut wood for sink lugs. IC1SL and IC3/4SL feature an exclusive, adjustable guide that doubles as a depth gauge. The IC3/4SL is exclusive in its 3/4" pipe diameter.

Catalog No.	Item Code	Blade Type	Blade Diameter		Blade Cutting Depth		Shaft Size	Weight

IC1RS	04503	Saw Tooth Blades for IC1	2
IC3/4RS	04508	Saw Tooth Blades for IC3/4	2

✓ WHY REED?

SL models offer exclusive, adjustable guide and depth gauge making it easier to cut from inside pipe where other tools won't go.

CLEAN REAM EXTREME™ PLASTIC PIPE FITTING REAMERS

FEATURES

- Clean leftover pipe and solvent cement residue from PVC, CPVC or ABS fittings.
- **Reduce labor time and materials costs** by reusing the fittings.
- Available in 7 sizes and fit into standard 1/2" drills (not included).
- Sturdy kits keep reamers organized and clean.

Money-saving reamers are designed to clean out the old or broken pipe and leftover solvent cement from a fitting so the fitting can be reused. In this era of green living and recycling, try these reamers on PVC, CPVC or ABS to save time and material costs. Plastic Pipe Fitting Reamers fit into 1/2" electric or cordless drills. PPR reamers work great for vent lines, drain lines and water lines. The carbide cutting insert provides a cutting edge on each side. Rotate before replacement and receive three bonus cutting edges.

SOLUTIONS KITS

FEATURES

- All the tools needed to **ensure a perfect joint**, every time.
- Works for plastic pipe such as PVC, CPVC, PP, ABS and PE.
- Cutter provides quick, square and clean cut on plastic pipe.

These kits contain tools required to install a perfect joint every time to prevent failures between pipe and fitting. Quick Release™ Cutter produces a square, clean cut which is imperative for proper, even stab depth into fittings and for reducing leak potential. DEB4 and DEB1 deburring tools produce even, consistent chamfer ensuring proper fitting penetration depth. And, at the same time, allow the solvent cement to move to the correct part of the pipe (side) for greater surface area solvent weld. The IC1SL Internal Pipe Cutter (in some kits) yields a uniform internal cut in hard-to-reach places where a tubing cutter will not fit. All tools are contained in a durable, hard plastic case.

PE PIPE PEELERS

FEATURES

- One tool does a range of pipe.
- Takes 2 minutes to attach to pipe and peel 6" PE.
- Creates a **uniformly** peeled surface.
- Works well even on out-of-round pipe.

PE Pipe Peeler prepares the outside diameter of polyethylene pipe for electrofusion by removing the oxidized layer and contaminants. PE Pipe Peeler can be used on the edge of the pipe or anywhere along the pipe with sufficient clearance for turning the tool around the pipe. Chain with thermoplastic rollers of acetel copolymer and plated side plates resist corrosion. Spring-loaded blade keeps consistent pressure on the pipe for a smooth finished surface. This blade tension means the blade does not skip. Its carbide blade provides a cutting edge on each side. Rotate blade before replacement and receive three additional cutting edges.

FLARE TOOLS FOR PE WATER SERVICE LINES

FEATURES

- Flare water service lines easily with this **innovative** and **inexpensive** tool.

Flare Tools for PE Water Service Lines form a permanent cold flare with ten easy revolutions to connect PE 160 psi water service tubing (SDR 9), using inexpensive, standard AWWA flare fittings for CTS tubing. These tools flare medium and high density PE.

DEB1 SERIES DEBURRING TOOLS FOR PLASTIC PIPE*

FEATURES

- DEB1 offers **knurled grip** for slip-resistance and durable aluminum body for longevity.
- **Deburr and chamfer** in the same rotation.
- Suitable for PVC, CPVC, PE, ABS and PP.
- Three sizes of pipe accommodated per DEB1 tool.

Patented **DEB1** tools deburr and chamfer to pipe manufacturers' recommendations in seconds. Plastic pipe joints get proper fit from smooth, chamfered ends delivered by DEB1 models. Use for PVC, CPVC, ABS, PE and PP pipe. Find three sizes in one tool for iron pipe size, copper tube size or metric sizes. **DEB1IPS-INT** is a double-ended tool to deburr both inner and outer diameters. All DEB1 models have internal pipe guides, knurled grip for slip-resistance and a sharpenable and/or replaceable blade.

NOTE: IPS is for use on iron pipe size and CTS is for use on copper tube size.

DEB4 DEBURRING TOOL

FEATURES

- Suitable for PVC, CPVC, ABS and PP.
- Deburr and chamfer in the same rotation using DEB4.

One easy revolution of Reed exclusive **DEB4** deburrs and produces a 15° external chamfer in seconds. Deburrs the pipe exterior only to allow easy assembly into fittings. It fits comfortably in one's hand for a secure grip. As an alternative to hand turning, there's a 1/2" square drive pocket on the backside for use with a ratchet wrench. DEB4 creates a smooth, chamfered pipe end so solvent can be spread evenly for pipe joining. Aluminum die-cast deburring tool features a hardened steel blade that is reversible, sharpenable and replaceable. Fits six nominal pipe sizes of up through 4" diameter.

CONE DEBURRING TOOL

FEATURES

- Suitable for PVC, CPVC, ABS, PE and PP.
- For deburring inside and outside of PE, use DEB2.
- Versatile DEB2 shape suits all plastic pipe sizes up through 2" (60 mm) pipe.

The **DEB2** cone shape deburrs the inner and outer edges of PVC, CPVC, ABS, PE and PP pipe through 2" diameter. Made from steel, the cone design allows it to be used on even the smallest pipe, including 1/8" diameter. The part that rests in the operator's hand features a thick plastic edge covering for hand comfort.

DEBURRING TOOLS (for metal) ON P. 13

PEX CRIMPERS

FEATURES

- Crimps rings easily, giving good connections.
- Crimpers are the right tools for PEX systems because they **properly seal** the rings without distortion.
- Each Reed copper ring crimper includes a go/no-go gauge and an Allen wrench.

PEX Crimpers squeeze the copper rings used on PEX brass fittings. PEX systems are used for potable water lines, radiant heat, snow melt and ice rink systems, among other applications. The design of these PEX crimpers eliminates tool marks and distortion on the rings. The tools crimp rings easily, making PEX installation a breeze. For one-hand use on 1/2" and 3/4" PEX, consider the **PEXOH12** or **PEXOH34**.

PIPE BEVELERS

FEATURES

- Beveler only needs a few turns around PVC pipe to safely make the smooth 15° bevel.
- Strong, reinforced aluminum frame for **durability**.
- Adjusts to **bevel multiple sizes** with one tool.

With a strong aluminum alloy frame, effective roller locking and good tool life, a Beveler produces a smooth 15° bevel on all types of plastic pipe, including gasketed PVC and C900 PVC in about one minute. Depending on wall thickness, the bevel can be up to 1 1/2" long. Beveler is easily adjusted for different pipe sizes and thicknesses, with no part changes. Bevel blade can be sharpened or replaced.

Catalog No.	Item Code	Pipe Capacity		Weight	
		in-nom.	actual O.D. mm	lbs	kg
BT1	04395	1 1/2 - 8	40 - 200	3.0	1.4
BT2	04398	1 1/2 - 12	40 - 300	6.1	2.8

NOTE: If pipe is not stationary, a Reed pipe vise is recommended.

✓ WHY REED?

Much faster, safer, and far more effective than a file or power saw as it reduces the possibility of injury and leaks after joining pipe.

PB4 in use

PB4

PB3 interior

CHAMFER TOOLS DRILL-POWERED

FEATURES

- Quickly chamfers pipe using drill power, eliminating user fatigue when making multiple cuts/chamfers.
- Deburrs inside and outside simultaneously, in just seconds.
- Produces smooth, consistent chamfer on PVC and CPVC, eliminating leak channels that can be caused by improper chamfer.

The Chamfer Tool attaches to an electric or cordless drill (not included) to chamfer both the inner and outer diameters of plastic pipe. PVC and CPVC pipe joints require a chamfer and Reed's PB series chamfers create a smooth, consistent, 15° chamfer in seconds. These chamfer tools are available in a kit consisting of 2", 3" and 4" sizes in a jobsite quality case or individually by size.

Catalog No.	Item Code	Description	Weight

PIPE TOOLS & VISES
SINCE 1896

UNIVERSAL PIPE CUTTERS FOR PE

FEATURES

- Special blades and blade guard for PE.
- Includes all the parts for successful PE cuts.

Reed's pneumatic-powered Universal Pipe Cutters (UPC) for PE are available to cut 8" - 48" nominal diameter (200-1300 actual O.D. mm) PE pipe. Both kits ship in a steel toolbox and include a UPC cutter, a filter-regulator-lubricator, UPCSTEEL6 and UPCPE8 blades. The UPCPE8 blade will cut large diameter PE pipe with a wall thickness up to 2 23/32" (69 mm). To cut 6" - 8" PE pipe, the UPCSTEEL4 blade must be purchased separately.

Catalog No.	Item Code	Pipe Diameter		Gross Weight*	
		in-nom.	actual O.D. mm	lbs	kg
UPC836APE*	07517	8 - 36	200 - 1000	101	45.9
UPC848APE*	07518	8 - 48	200 - 1300	106	48.2

*EXCLUSIVE

*GROSS WEIGHT includes all components plus packaging.
#07517 and #07518 units do not require a water tank and one is not supplied.

REED TRAINING VIDEOS

Reed Manufacturing Company has a dynamic online library of training videos. The videos are in English. Often, however, simply viewing the demonstration makes the tool use more understandable, no matter the language.

Reed recommends a high speed connection for viewing or downloading these videos. Reed also offers a USB drive of the video library. Request it as #01063.

videos.reedmfgco.com

✓ WHY REED?
Proprietary tool cuts square on even the largest plastic pipe: 28" (800 mm). Cut and bevel in-line.

PLAS2

PLAS1 works great for C900 water pipe.

ONLINE VIDEO TRAINING

PLAS1

EXCLUSIVE TOOL

PLAS1PE

PLAS IN-LINE ROTARY™ CUTTERS

FEATURES

- **Clean and safe!** No chips to clog valves and apertures.
- Only 6" - 8" clearance needed to turn PLAS around pipe.
- Cuts out-of-round pipe because of **spring loaded nuts**.
- Inexpensive tool to make a cut for a tie-in or pipe break and then get the line back in use. **Reduce overall labor costs!**

PLAS In-Line Rotary™ Cutters are excellent for cutting PVC or PE pipe in trench or above ground. Each PLAS rotary cutter needs just 6" to 8" (153 - 203 mm) clearance around the pipe, making them easy to operate in trench and with lower prep costs. Outboard rollers keep the cutter aligned on pipe, ensuring a square cut every time. Carbide-tipped blades for PVC are long-lasting and penetrate up to a 2" wall thickness.* Each PVC cutter also can produce, in-line with the cut, a 15° bevel on both sides of the cut. In addition, Reed has developed a hardened, tool steel blade to cut PE pipe. The curved blade drives chips out of the way, making PE cuts much easier. PLAS In-Line Rotary Cutters can retrofit for PE by purchasing PLASPEB blade #94485 separately.

*EXCLUSIVE

NOTE: 04470, 04475, 04480, 04485 ship with cutting blade for PVC. Models 04474, 04477, 04483, 04487 ship with cutting blade for PE. Blades are interchangeable.

*PLAS CUTTERS WILL CUT PVC AND PE PIPE. SPECIFIC LIMITATIONS FOR PE ARE AS FOLLOWS: 2" (50.8 mm) wall thickness PE - up to 14" pipe, 1 1/2" (38.1 mm) wall thickness PE - up to 18" pipe, 1" (25.4 mm) wall thickness PE - up to 28" pipe.

PLAS HAND-OVER-HAND ROTARY™ CUTTERS

FEATURES

- **Attached handles** permit fast hand-turning – about half the cutting time of a regular PLAS cutter.
- Leaves a **disposable remnant** (not dust or chips) that is easy to recycle.
- Simple to transport and fast to use on PE and PVC.

Exclusive to Reed, PLAS Hand-over-Hand Rotary™ Cutters excel at cutting PVC or PE pipe in trench or above ground. They feature attached handles which permit fast hand-turning. Once the cutter is positioned around the pipe, the operator turns it for one revolution, feeds the cut-off tool closer to the pipe, and continues turning/feeding as needed. These OH models require 11" (280 mm) clearance around the pipe. Attached handles means there is no need to reposition a handle after each turn, compared to a regular PLAS (above). The built-in handle convenience equals no loose parts. Like PLAS Cutters above, outboard rollers keep the cutter aligned on pipe, ensuring a square cut every time. The tool's carbide-tipped blades for PVC are long-lasting and penetrate up to a 2" wall thickness. Each PVC cutter also can produce, in-line with the cut, a 15° bevel on both sides of the cut. In addition, Reed offers a hardened, tool steel blade to cut PE pipe. The curved blade drives chips out of the way, making PE cuts much easier.

PIPE TOOLS & VISES
SINCE 1896

GUILLOTINE PIPE CUTTERS

FEATURES

- **Squarest cut** available for PE due to strong frames and unique blade design.
- Saves facing cost: no facing needed for electrofusion, less needed for butt-fusion.
- Requires minimal clearance, only 4" - 6" (102 - 152 mm) around pipe.
- **Clean and safe!** No chips to clog valves and apertures.
- Many **high quality cuts**, with durable non-stick coated, tool steel blade.

Robust Guillotine Pipe Cutters are designed to cut PE pipe from SDR 15.5 to SDR 9 within 1/8" (3 mm) of square on medium and high-density pipe. **HPC12** is designed for DIPS and IPS PE pipe from SDR17 to SDR9.3. Brass bushings in HPC12 crosshead feed assembly yield smooth feed and more consistent blade alignment. The accurate cuts from Reed Guillotine Cutters mean no facing is needed for electrofusion and only minimal facing for butt fusion joints. Durable, non-stick coated blade makes many square cuts with no chips to clog valves and small openings. Slight taper on blade allows an easy start to the cut, and holds form for a nice, straight cut. Blades are easy to sharpen or replace.

NOTE: Reed strongly recommends use of the [GROUNDING ACCESSORY ON P. 35](#) with Guillotine Cutters. Use a grounding accessory as a precaution against static build-up. Dissipate the charge and minimize the possibility of ignition.

HPC4

Blade Taper

✓ WHY REED?

Because of the crosshead and blade design, all HPCs produce a much straighter cut with minimal blade wear. Safer than abrasive saws because no PE chip residue remains in the pipe that may later clog valves.

PE SQUEEZE-OFF TOOLS

FEATURES

- Robust aluminum bars on PES2 and larger models reduce tool weight for **easier handling**.
- Positive stops **prevent damage** caused by over-clamping.
- Easy to use in line because of swing bar and **no loose parts**.
- PES1 built-in stops and "C" shape allow easy movement on and off pipe.
- **With the proper stops**, PES2, PES4, PES6 and PES8 also work for metric pipe.
- Double-bar design on PES2-2 models gives two squeeze points in a row which provide better shut-off and **extra protection** against leaks, all in one tool.
- Wide variety of stops for all Reed PE squeeze-off tools.

Reed offers the best designed tools for stopping flow in 1/2" up to 8" PE pipe. Different models handle a wide range of pipe sizes and applications. Sliding bar handles make work in tight places easier and increase leverage for tightening. Fine-pitched thread on feed screw allows for a controlled, low-effort squeeze. Grease fittings at friction points make operation smoother and extend tool life. Aluminum bars are anodized or painted for protection from the elements. All PE squeeze-off tools use positive stops to prevent damage caused by over-clamping. Multiple size/SDR settings on one pair of stops provide quick, convenient over-squeeze protection for standard pipe sizes.

NOTE: Reed strongly recommends use of the [GROUNDING ACCESSORY ON P. 35](#) with PE Squeeze-Off Tools. Use a grounding accessory as a precaution against static build-up. Dissipate the charge and minimize the possibility of ignition.

HYDRAULIC & MANUAL, LARGE DIAMETER

FEATURES

- Manual PES6M and PES8M are lower-price and lighter-weight than the hydraulic models, making them practical for carry-in jobs, infrequent use or budget-minded work crews.
- PES8H handles large diameters with ease due to its included, separate hydraulic hand pump that allows the operator to work the pump from a convenient surface.

Catalog No.	Item Code	Capacity		Power Source	Pipe/SDR Stops		Length		Gross Weight*

FCVPES8H

GROUNDING ACCESSORY

FEATURES

- Ground the work area to increase safety for the operator.

The Static Electricity Grounding Accessory (PEGR) provides a path to ground for any static charge. Because static can build up on plastic pipe, even for water services, there is a possibility of a spark discharge of sufficient energy to cause ignition if the proper air/gas mixture is present. Use of a static electricity grounding accessory is a precaution that can dissipate the charge and minimize the possibility of ignition. Reed strongly recommends use of this grounding accessory with PE Squeeze-Off Tools and Guillotine Pipe Cutters in all gas applications.

Catalog No.	Item Code	Weight	
		lbs	kg
PEGR	04619	1.5	0.7

PEGR

STATIC DISCHARGE ALARM

FEATURES

- Be aware of static in the work area by use of a discharge alarm.

Static Discharge Alarm warns of static build-up. Static build-up can lead to possible pinholing of PE pipe resulting from electrical forces discharging through the pipe wall during squeezing or cutting. Static discharge alarm features test circuit and low battery warning. Plastic case included. Use with Grounding Accessory.

GASKETED

EXCLUSIVE TOOL

ONLINE VIDEO TRAINING

NOTE: PPJVS sold separately from PPJ.

✓ WHY REED?
Easy-to-use design for one person operation with no leaks.

SOLVENT CEMENT

EXCLUSIVE TOOL

NOTE: Fitting attachment (PPJFA) and saddles sold separately from PPJ.

Need to join to an elbow? PPJFA is the solution.

PLASTIC PIPE JOINERS

FEATURES

- Join or separate **gasketed PVC pipe** using the PPJ and PPJVS universal saddles.
- Efficiently connect 4" - 12" (114 - 324 mm) PVC **solvent cement** joints using the PPJ and individually sized saddles.†
- PPJFA Fitting Attachment is required for **solvent cement** branch connections only.

With 28-to-1 leverage, it is easy for one person to join PVC pipe up to 16" gasketed or up to 12" solvent cement joints, using a Reed Plastic Pipe Joiner.

FOR GASKETED PIPE: The Plastic Pipe Joiner can connect and separate 4" - 16" IPS and cast iron size gasketed pipe. Components required for joining gasketed pipe include the Plastic Pipe Joiner (**PPJ**) and V-shaped saddles (**PPJVS**).

FOR SOLVENT CEMENT CONNECTIONS: The Plastic Pipe Joiner connects solvent cement joints on all pipe schedules, IPS and water pipe from 4" - 12". For solvent cement connections, individually sized saddles must be ordered together with the **PPJ** Plastic Pipe Joiner. **PPJFA** fitting attachments are sold separately and only required for branch attachments.

NOTE: Connection saddles for gasketed pipe or solvent cement connections must be purchased separately.
